How to send an email campaign

Sending out an email campaign to your existing client base has never been easier! If you've picked a design, edited the information and got your list of email addresses to contact then you're good to go!

From Enter who you would like the message to appear to be from. Limited to 11 characters.

Message Enter the message you'd like to send out. Limited to 100 characters. A clickable URL will be included in the message automatically.

Phone numbers You can add phone numbers in two ways:

And/Or

1) Type a new phone number in the "enter a phone number" box and confirm by clicking the **+** button.

2) Upload a .xlsx or .xls file containing phone numbers. Please note that the file should contain only one column with phone numbers with no empty cells between them.

You can remove a phone number from the list by clicking the button.

Once you've got to the above page, you can preview your email template by clicking on the "preview" button.

Subject: This is what your client will see before opening the email – make it catchy!

Email contents: If you want to see what your email campaign looks like, click "preview".

Email address: If you're sending your campaign to a small group of clients, then you can manually type their email addresses in. Click the green "+" button each time you want to add a new email address.

Upload email addresses: Click this button if you have a document of email addresses you want to send to. This option is a good idea if you are sending your campaign to a large group of clients.

Click send!

How to get here...

- Click "Promote your campaigns" on the dashboard
- Find the campaign you want to promote then click "Promote this campaign"
- Click "Promote to existing clients"
